PRESS RELEASE #1

SARE International Multiplier Event Highlights Project Results and Impact

On 9 June 2026, the **SARE Project** consortium successfully organised its **International Multiplier Event**, bringing together **over 120 participants** interested in sustainable and resource-efficient agriculture.

Held online via Microsoft Teams, the event showcased the key results developed throughout the project and provided an opportunity for participants to learn more about innovative approaches to sustainability in the agricultural sector.

During the event, the consortium presented the SARE Project's main achievements, including the findings of the **SARE Focus Group**, the **training materials** developed, the **SARE Digi-Hub**, and the project **website**.

Participants also learned about the outcomes of the **national training activities** implemented in the partner countries, as well as the opportunities for adapting and **transferring the project's results** to different contexts and target groups.

The presentations highlighted the importance of digital learning, knowledge sharing, and capacity building in supporting more sustainable agricultural practices.

Feedback collected through an evaluation questionnaire, demonstrated a very high level of satisfaction. All respondents stated that they would recommend the event to others, while 89% reported being very satisfied with the overall quality of the event. The average evaluation score reached 4.85 out of 5. The results confirm the relevance of the project outputs and their potential value for future users and stakeholders.

The positive response received during the event highlights the continued need for accessible educational resources and collaborative initiatives that support sustainable and resource-efficient agriculture across Europe.
