PRESS RELEASE #2

SARE Final Meeting Reviews Project Results and Future Sustainability

On **2 July** 2026, the **SARE Project consortium** held its **Final Meeting** online, bringing together all project partners to review the project's implementation, results, and final steps.

During the meeting, partners discussed project management, outcome analysis, dissemination, quality assurance, sustainability, multiplier event success, and final reporting requirements. The meeting helped partners assess whether the project outcomes met expectations and confirm the remaining tasks before project closure.

The consortium reviewed the **main results achieved**, including the SARE Focus Group findings, the SARE DigiHub, training materials, national training activities in Poland, Cyprus, and Malta, and the International Multiplier Event. These outputs have supported digital and green skills in agriculture and promoted smart, sustainable, and resource-efficient farming practices.

Partners also discussed **final dissemination activities**, such as the reporting log, newsletters, press releases, website updates, and continued promotion of the SARE DigiHub and training materials. The DigiHub remains a key project result, providing open access to educational resources and project outputs for farmers, trainers, educators, VET providers, and stakeholders.

The meeting also focused on **sustainability and exploitation**. Partners highlighted the importance of keeping the project results accessible after the project ends and continuing to promote them through their networks.

The final project stage will focus on completing reporting tasks, finalising the dissemination and quality assurance reports, confirming final evidence, and supporting the **Final Project Report**. The meeting confirmed that SARE has produced practical outputs that can continue supporting sustainable agriculture, resource efficiency, and digital transformation beyond the project lifetime.
